2. Make sure sump is free of string, cloth, nails, gravel, etc. before installing pump.
3. Do not set pump directly on the bottom of sump if it is not solid. Raise the pump by using bricks or concrete blocks underneath it.
4. Use steel or plastic pipe for all connecting lines between pump and sewer outlet.

**Note:** Some city regulations do not allow installing a pump with plastic pipe. Check local regulations.

5. In applications where the pump may sit idle for months at a time, it is recommended that the pump(s) be cycled every month to ensure the pumping system is working properly when needed.
6. Ion Technologies check valve must be installed in discharge pipe.
7. An audible alarm system for high water conditions should be installed with every pump for greater protection. For additional control panels contact your Ion Technologies distributor.
8. Connect to power source using 3-prong grounded AC receptacle. Do not remove ground pin from electrical plug. Do not use an extension cord.
9. Use pump partially or completely submerged for pumping water-like liquids (temperature to 140°F). The MSP-SHK will pump solid materials up to 1.5" (spherical) in diameter.
